

Our immersive solutions

**Best
solutions
for event
& exhibition
industry**

Suspended projection dome

Suspended projection dome

Suspended projection dome are exceptionally striking and make **powerful promotional** and exhibit tools.

Our domes offer unlimited possibilities not only for projection, but also for interaction, such as the use of a touch table, which gives viewers control over the content displayed in the projection dome.

POLIDOMES

OUR IMMERSIVE SOLUTIONS

Polidomes dome screens can also be floor mounted on truss support legs enabling viewers to walk freely underneath the dome screen.

The screen can be tilted to any angle, even horizontally.

The projection dome screen is tilted on steel pillars to allow the public to move freely in and out of the 360° degree projection showroom.

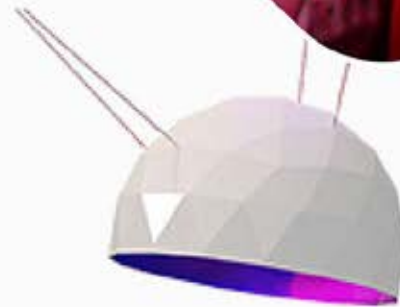

Suspended projection dome screens are the cost-effective little brother of our famous 360° full dome projection domes.

Suspended dome screens require no doorways, flooring or HVAC system.

Circular room

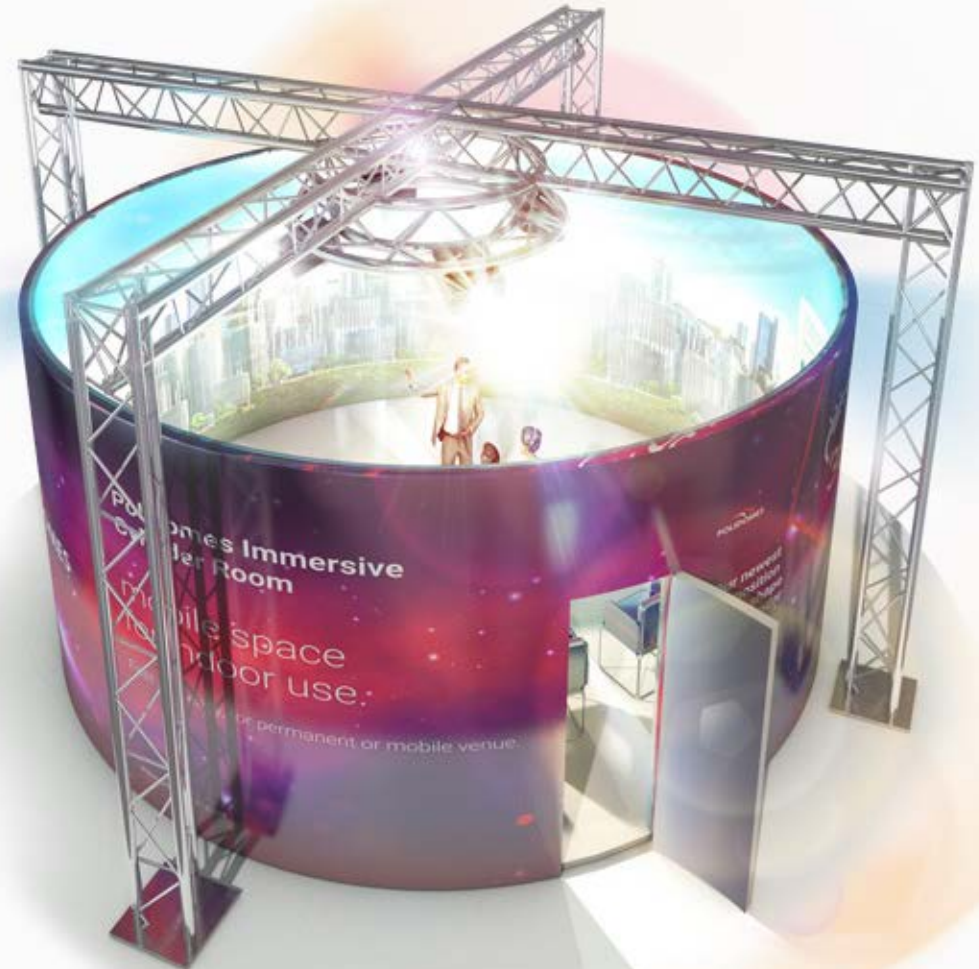

Circular immersive room

Create a spectacular 360° immersive **reality experience** in a tailor - made circular room!

Polidomes portable Immersive cylinder rooms create a 360° immersive space that can be enjoyed by a group without need of VR headsets. Polidomes 360° immersive cylinder rooms are an ideal way to present your brand, products, exhibit or services anywhere. your audience will be stimulated by a full surround, crystal - clear display. Add interactive capabilities to fully engage Your users attention.

Our portable immersive cylinder rooms are lightweight, easily transported and setup and create an ideal space to display your own chosen digital content in 360°. They are an ideal solution for tradeshows, simulations, exhibits, workspaces, entertainment and much more.

1 The strong structural support of a cylinder

is based on its high - quality galvanized steel frame which is perfect for a 360° cinema which does not require inside walls or additional columns and supports.

3 360° surround inner projection screen

The seamless inner projection screen is made of the same material as cinema screens for distortion free projections.

2 High quality outer cover - full color branding available

The outside cover is made of high - quality material that is highly resistant to mechanical damage and will last for years. Your choice of colors. Full color printed branding or removable, temporary custom decals available.

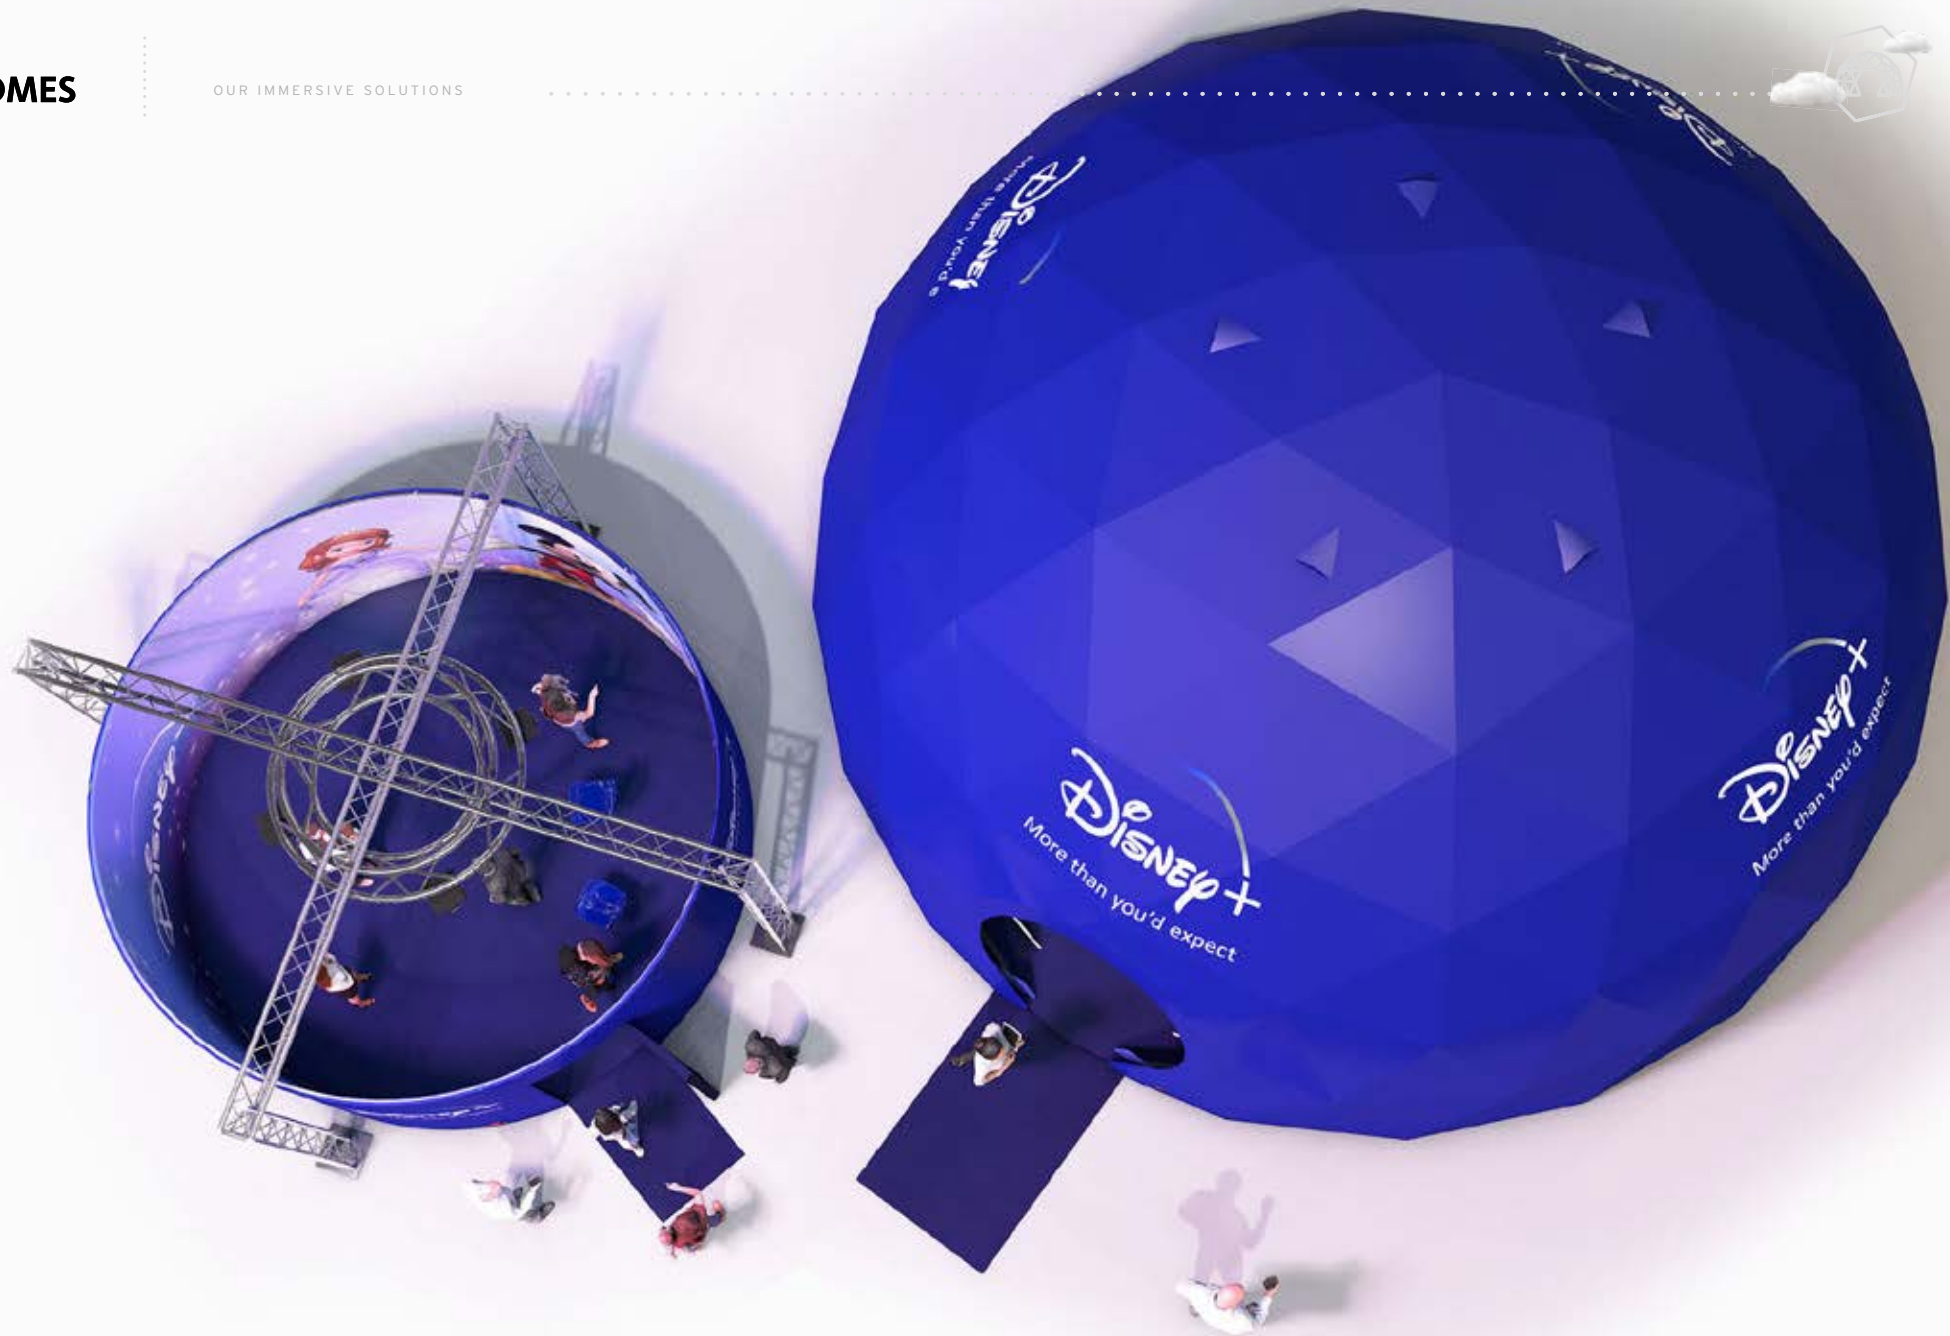

4 The images presented on screen are strikingly clear and realistic

The screen completely and smoothly covers the steel structure providing the audience with a chance to become fully immersed in the virtual reality presented.

5 Multimedia projections

are accomplished using sets of Full HD / 4K projectors, specialized calibrating software, and an independent Dolby 5.1 Sound system with individual effect control to obtain the ultimate in audio - visual experience.

reality

POLIDOMES

OUR IMMERSIVE SOLUTIONS

Our projection domes create a spectacular 360° Immersive Reality Experience that fills the entire inner surface of the projection dome.

This hi-tech solution provides marketers and event hosts with a limitless range of creative opportunities. The 3D dome projections are exceptionally striking and provide a powerful promotional tool that stirs the imagination, engages audiences, inspires emotions and offers a remarkable, unique experience.

Viewers are immediately carried into an alternative reality of sight and sound.

Full dome projection domes are ideal for unforgettable meeting rooms! Improve your fair stand!

Let your guests see your show!

1 Galvanized steel framework

The galvanized steel frame is easily assembled and provides maximum stability for planetarium domes and creates a perfect 360° space without need of walls or support columns.

2 Projection screen

The inside projection liner is made of the same material as cinema screens and is held in place by Polidomes negative pressure system for a wrinkle-free, seamless screen which is perfect for 360° projections.

3 Outer cover

The outer cover membrane is made of the highest quality material. It is completely opaque, weatherproof, fire, tear and mold resistant. The cover can be fully color printed with your choice of branding.

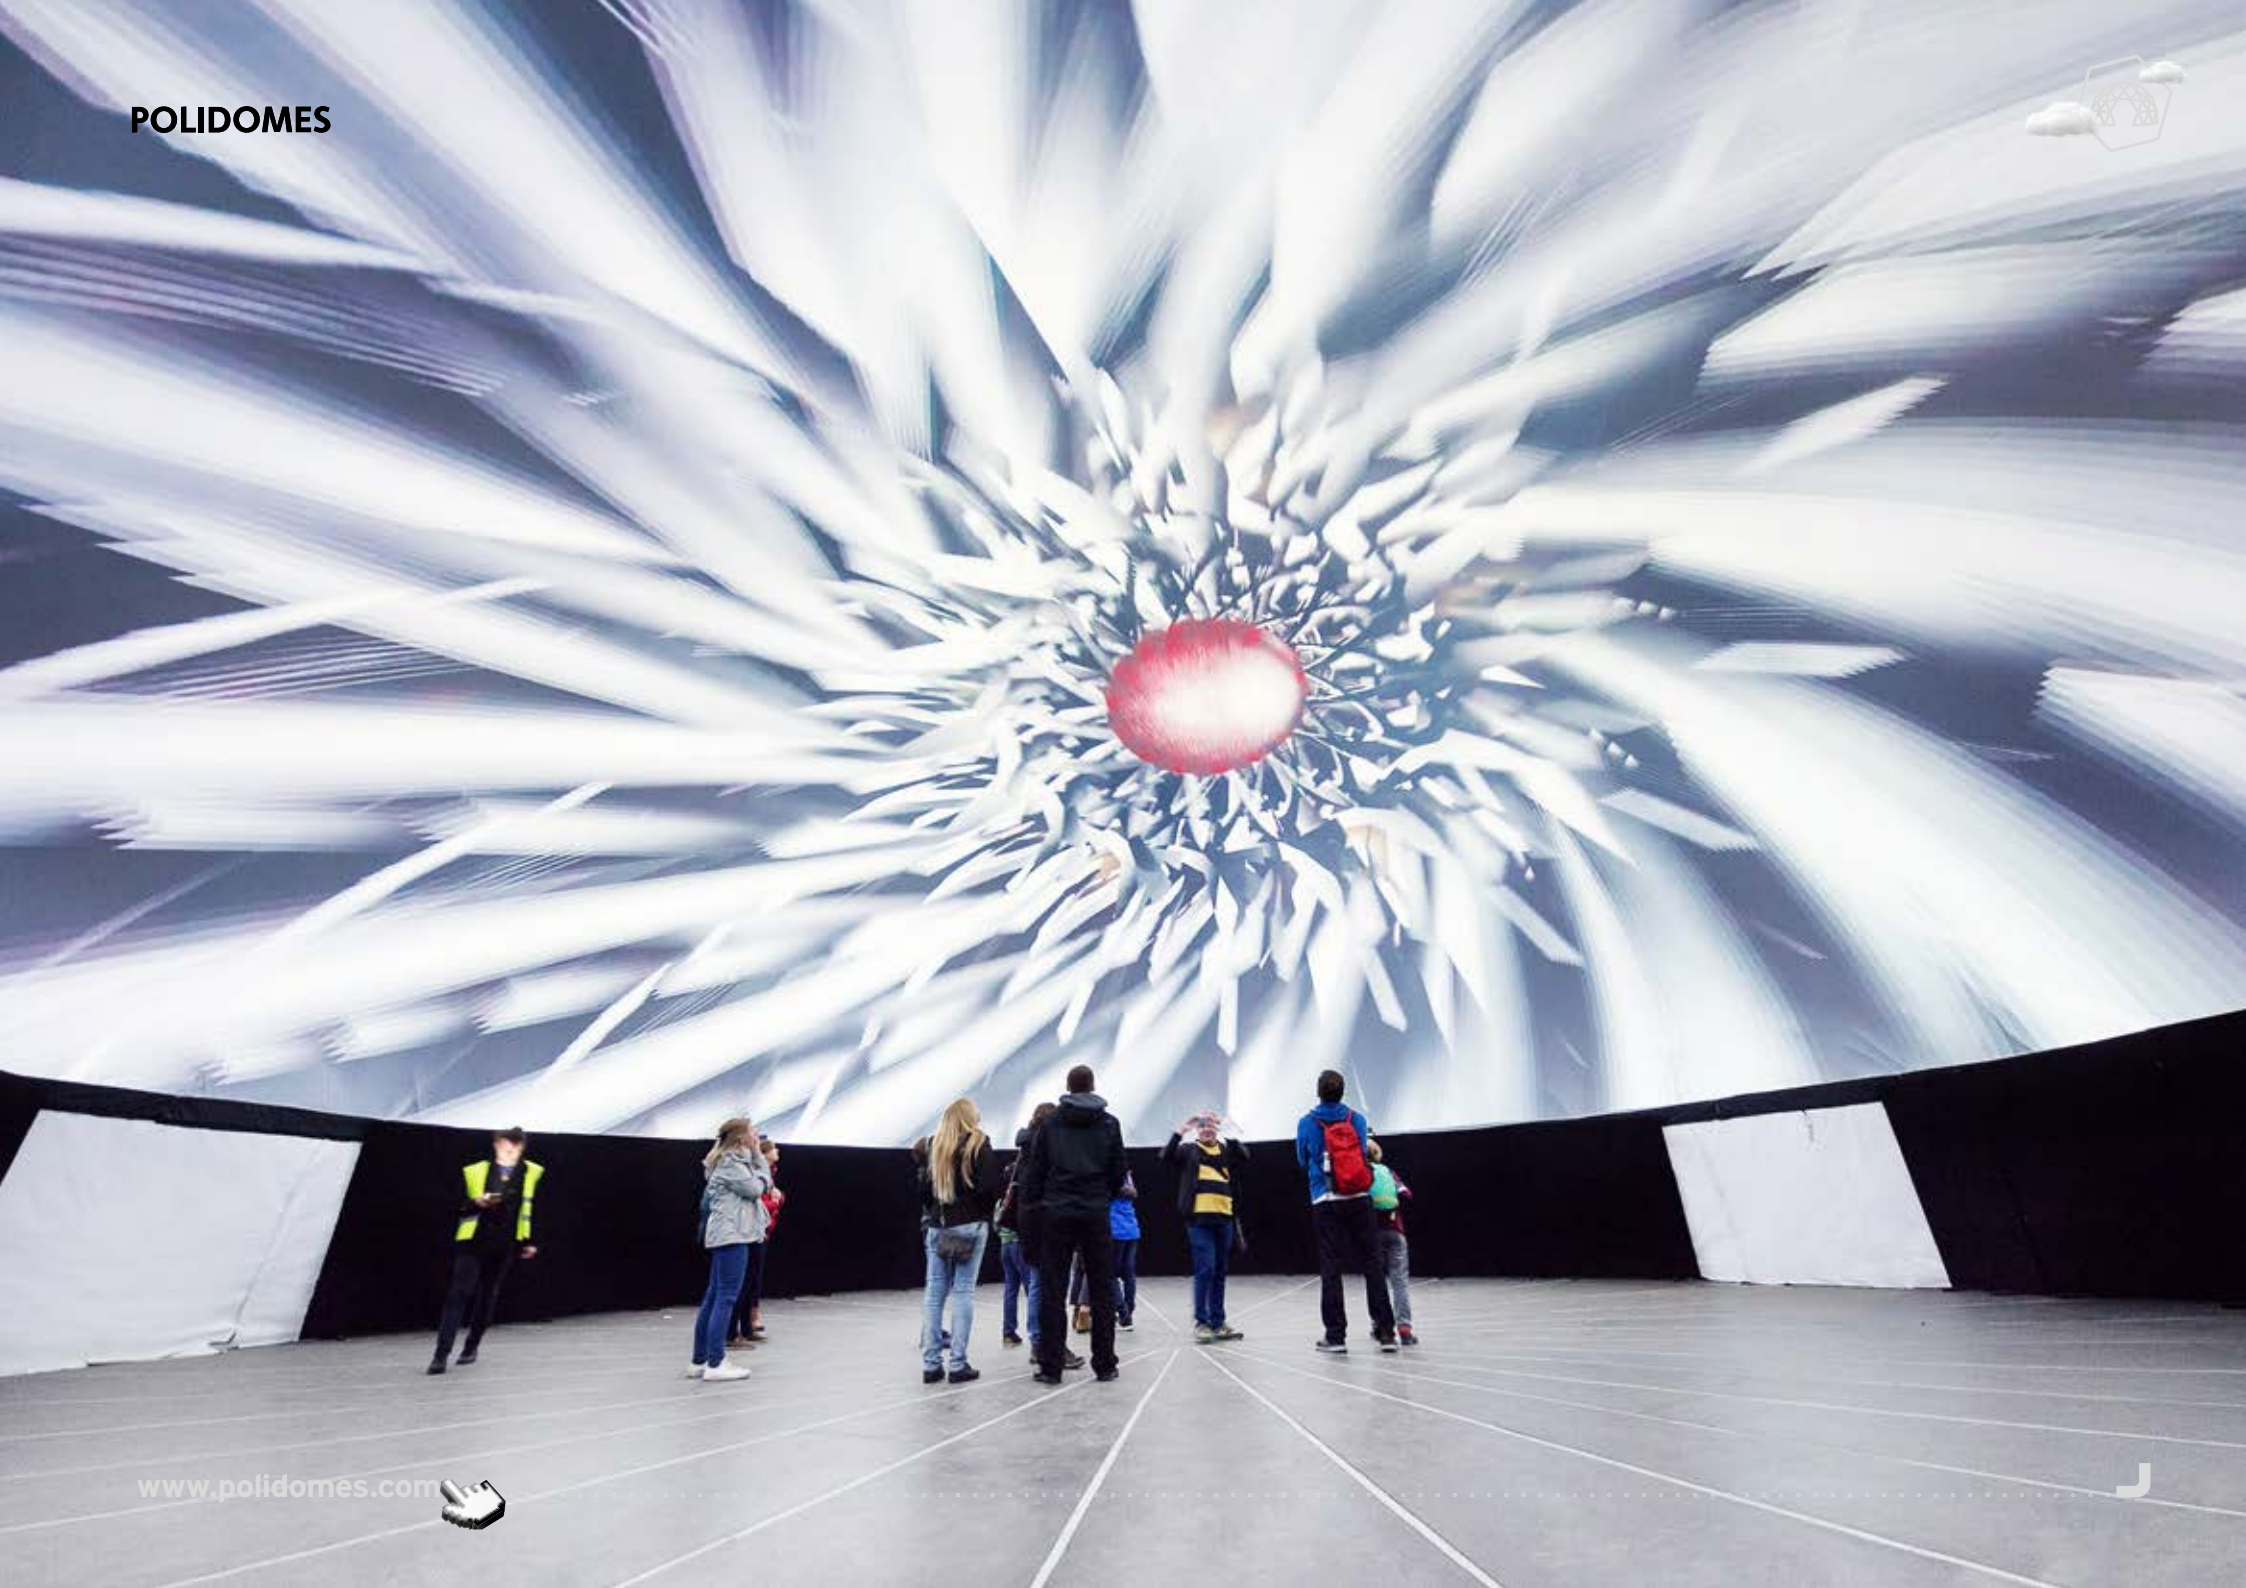

4 Crystal clear imagery

Take your audience to any places in or out of this world. The combined elements of a Polidomes projection dome create an immersive reality experience to bring your 360° content to stunning life!

5 Projector & sound

Polidomes uses a spherical multi - projector system and full surround 7.1 Dolby speakers to create an out of this world atmosphere. We also offer a wide variety of 360° projection content.
